PROFILE

Java Backend Developer with hands-on experience in building backend projects using Java, Spring Boot, and MySQL. Developed RESTful APIs and implemented CRUD-based applications using Spring MVC and JPA/Hibernate. Strong understanding of OOP principles, SQL, and MVC architecture. Eager to contribute to backend development teams and grow in a professional environment.

SKILLS

- **Languages** — Java, JavaScript (ES6+), SQL, HTML5, CSS3
- **Frameworks & Libraries** — Spring Boot, Spring MVC, Spring Data JPA, Hibernate, React.js
- **API Development** — RESTful APIs (Design & Development), Request Validation, Swagger / OpenAPI
- **Databases & Connectivity** — MySQL, JDBC
- **Tools** — Git, GitHub, Maven, Postman, Vite, JUnit 5, Mockito
- **Concepts** — DTO Pattern, Exception Handling, Webhooks, MVC Architecture, Microservices Fundamentals, Layered Architecture, SOLID Principles, Unit Testing (Mocking, AAA Pattern)

INTERNSHIP

Java Developer Trainee

08/2025 – 09/2025 | Hyderabad

HulkHire Tech | Remote (Completed)

- Designed a modular microservices architecture with validation, processing, and payment workflow services.
- Built a Stripe-based payment processing system using Spring Boot, handling request validation, transaction processing, and webhook-driven status updates.
- Implemented secure webhook validation, asynchronous event handling, and realtime transaction status updates.
- Developed REST APIs, tested using Postman, and documented endpoints with Swagger.
- Used MySQL for transaction persistence and service coordination.

PROJECTS

Social Media Backend Platform (JSPGram)

Backend

- Designed RESTful APIs using Spring Boot for authentication, users, posts, comments, follows, and payments.
- Implemented session-based authentication with OTP verification and secure login/logout workflows.
- Validated user input using Bean Validation and custom business validation before persistence.
- Developed layered architecture with Controllers, Services, Repositories, DTOs, and Mappers for maintainable code.
- Integrated MySQL with Spring Data JPA to manage users, posts, comments, likes, and follow relationships.
- Uploaded and managed profile and post images using Cloudinary integration.
- Integrated Razorpay order creation and payment verification for Prime membership functionality.
- Standardized API responses and centralized exception handling using generic response DTOs and custom exceptions.

Frontend

- Developed a React and Vite frontend with React Router for authentication and social media workflows.
- Integrated Axios services with REST APIs for users, posts, comments, follows, and payments.
- Implemented protected routes, responsive navigation, loading indicators, and toast notifications for improved user experience.
- Built profile management, feed, search-related navigation, followers, following, suggestions, and Prime membership interfaces.
- Configured environment-based API endpoints and centralized HTTP interceptors for session management.

Tech Stack

Backend: Java 17, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, MySQL, Maven, Lombok, Bean Validation, Cloudinary, Razorpay

Frontend: React, Vite, JavaScript (ES6+), React Router, Axios, Bootstrap, React Toastify Tools: Git, GitHub

EDUCATION

Bachelor of Engineering (Computer Science)
Atria Institute of Technology, Bangalore

2020 – 2024

CERTIFICATES

- Java Developer Trainee, HulkHire Tech
- Java Full Stack Development, JSpiders

LANGUAGES

- English
- Hindi
- Kannada
